Projects

MICROSERVICES-BASED SHOW BOOKING SYSTEM - 2025

Built a microservices-based show booking platform using Spring Boot, Spring Data JPA, and OpenFeign. Integrated with Eureka Server, API Gateway; containerized using Docker & Docker Compose, and deployed using Kubernetes.

Road Accident Analysis Dashboard (UK) - 2025

Created a Tableau dashboard analyzing UK road accident data (2019–2022) by weather, vehicle type, location, and severity. Visualized key trends and hotspots to support data-driven road safety insights.

MOTION GESTURED MOUSE CONTROLLER - 2024

Developed a Python application that controls mouse movements using real-time hand gestures. Used Mediapipe, OpenCV, and PyAutoGUI for gesture recognition and UI interaction.

TURF BOOKING SYSTEM - 2024

Android-based app for booking turf slots, featuring user authentication and real-time database via Firebase. Integrated Google Sign-In for a seamless login experience.

BOOK RECOMMENDATION SITE – 2024

Web application that recommends books based on user preferences like genre and interests. Built using Node.js, SQL, HTML/CSS, and JavaScript, with a focus on responsive UI.

Internships

Anunta Technology Management Services – May 2025 - July 2025

As a Technical Pre-Sales Intern at Anunta Tech, I collaborated with the sales and solutions teams to support the design and presentation of IT infrastructure and cloud-based solutions to prospective clients. My responsibilities included preparing technical documentation, assisting in solution demos, and analyzing client requirements to align with Anunta's service offerings. This role enhanced my understanding of virtual desktop infrastructure (VDI), cloud computing, and the pre-sales process.
